

A FIRST AID PROGRAM PARTNERSHIP

The Accel Group Partners with CITY Laundering as a First Aid Provider

A first-aid program shows your employees and business partners that you are committed to the well-being of everyone interacting with your company. By partnering with CITY, The Accel Group and DISCOVERisk can provide an all-encompassing risk management program for clients.

"The CITY first aid program is valuable and unique." Lisa Hingst, Risk Improvement Strategist with ACCEL said. "Safety and relationships are very important to me and working with CITY first aid is a great way to enhance both. I am excited to incorporate this into my work with clients."

Why Choose the CITY first aid program?

The CITY first aid program offers wall-mounted first aid cabinets with regularly scheduled deliveries of products such as bandages, over-the-counter medicines, and personal protective equipment. It also includes an inventory management service for these products.

CITY understands how important relationships are between vendors, customers, and coworkers. CITY also realizes how important it is for clients to rely on a fully stocked first aid kit. Depending on the size of your operation, it may take a designated team to ensure your employees are safe and your business is compliant. CITY is committed to making sure your business gets what it needs to succeed. All first aid kits and other services are customizable to fit the exact needs of your company, because we know one size does not always fit all.

Building a Culture Around Safety

Companies want to help employees feel their best and want to prevent absenteeism due to health reasons. CITY's first aid service will not only help you maintain the right supplies for your work environment, but also promote a culture of continuous safety. Through a systematic audit process, CITY can help with OSHA compliance, as well as health and morale. With trained representatives, CITY will keep it clean and simple so businesses can be safe and protected.
